

# BENNY'S OIL FILTER RECYCLING

## WHAT HAPPENS TO YOUR FILTERS?

Collection routes are built daily from forecasts among about 6,000 customers covering an ever growing California territory.

Squeeze about 100,000 gallons of oil from nearly 10,000 drums of filters annually.

Filters after cubing and oil extraction.

About 1.5 million pounds are sent to steel mills to produce new material.

Rebar is one example of a finished product.

## BEN-ZORB QUALITY ABSORBENT PRODUCTS DELIVERED TO YOUR DOOR

We did all the research and all the testing so you don't have to. Because one size does not fit all, even for absorbents, Benny's offers distinctive products to do distinctly different jobs.

### GREASWEEP

Greasweep is a non-selective, multi-purpose absorbent, perfect for oil spill cleanup, spill control and containing spills. Although slightly abrasive, with a little care, it can safely be used on nearly any surface - even highly polished, waxed or other finished floors. Highly absorbent, Greasweep is great for heavier / thicker liquid spills.

### SPILLGUARD

Great for an outdoor absorbent. It is very heavy and will not blow away. When wind is a factor, Spillguard would be the product of choice. Ideal for spill cleanups such as hydraulic fluid, fuel oil and chemical spills. Cleans up roads, parking lots and fuel islands. It can be left in place for those nagging drips and leaks. Non-carcinogenic and non-toxic.

Federal DOT Reg. Nbr. 052703 010 040LM

California EPA Number CAR000129254

California Hazardous Waste Authority Control Number: 156146

License Number 134331

CHP Carrier Number 161987

## MORE THAN OUR NAME IMPLIES

NEW!

- ▶ Oil and Antifreeze Service
- ▶ Filter Service
- ▶ Hazardous Waste Service
- ▶ Performance Absorbents

**One Call Does it All!**  
**323-773-2230**

**Continuous and  
Reliable Since 1989**

## A TIP FOR THE WISE

Compliance enforcement is now a matter of revenue as well as health and safety. More fines are assessed to fund more inspectors to force compliance until such time as automated computer procedures are capable of oversight. Changes to existing laws appear more rapid and the compliance expense greater to comply.

These are some of the most common items that seem to be issues of focus:

- ▶ Present a clean and tidy workplace with waste properly containerized and floors free from oil and grease.
- ▶ Properly label drums with lids for each type of waste.
- ▶ Mark drums with accumulation dates.
- ▶ Retain evidence of proper disposal within prescribed time periods.

Some customers prefer to let Benny's manage their entire waste stream including the dispatch and billing for oil service. This has minimized aggravation for them, while maximizing our expertise and relationships with oilmen, inspectors and disposal facilities. By having full knowledge we can provide you with better information almost immediately. When an inspector arrives on your premises, he is asked to call us for information. Usually, an immediate fax of your history from us is all that is needed for his satisfaction.

## WHAT'S IN IT FOR YOU WHEN YOU CHOOSE BENNY'S?

### ONE CALL DOES IT ALL

Benny's does nearly every waste our customers are likely to have. From Oil and Filter Service Recycling, to used oils and antifreeze, to Hazardous Waste, Benny's takes care of it. We also offer quality absorbent products that are perfect for oil and spill cleanup. It makes sense to choose Benny's.

### TALK TO A REAL PERSON - NOT A MACHINE

A real person answers our phone. You can usually even reach someone here on the weekend. By the way, there is a Benny and he visits customers every day.

### KNOWLEDGEABLE PERSONNEL

We have the answers because we invested the time and bought the tools so you don't have to.

### WIDE SERVICE AREA

One look at our service area map will say that we can serve any area you are likely to have locations.

### PROMPT SERVICE

We are proud to say that we can service most of our customers the next business day.

### HISTORICAL ARCHIVES FOR YOUR ORDERS

Ask us about your first order ever, your last, or the next time you are scheduled.

### INSPECTOR INTERVENTION IF NEEDED

Questions can usually be answered in minutes without you digging through all your records.

## WHY SO COMPLICATED?

- ▶ Each waste must be separately profiled
- ▶ Each disposal facility requires submission on their forms
- ▶ Each disposal facility only accepts certain wastes
- ▶ Disposal facility approval must be received by us before we pick up from you
- ▶ Disposal facilities receive waste by appointment only
- ▶ Timing between pickup and delivery is critical
- ▶ Numerous reports are required by different State Departments
- ▶ Frequent inspector interventions on behalf of customers

## REMEMBER - ONE CALL DOES IT ALL

Benny's can manage your entire waste stream from beginning to end.

### The following are some of the wastes Benny's routinely handle:

#### Solids:

- ▶ Absorbents
- ▶ Aerosol cans
- ▶ Gas pump filters
- ▶ Grease
- ▶ Paint filters
- ▶ Rags
- ▶ Drums, cans, and buckets

#### Liquids:
